Principle

PRODUCT DESIGNER: MICROSOFT - BING (TEKSYSTEMS)

MAY 2019 - FEBRUARY 2020

Lead the design and creation of the Bing Mobile UI Library.

Actively participated in the UI modernization of Bing's search engine result page and OneMap experience.

UX/UI DESIGNER: T-MOBILE (ADITI STAFFING)

SEPTEMBER 2017 - APRIL 2019

Devised creative solutions enabling the user to complete key tasks for many of the core features on T-Mobile DIGITS and BusinessHub Connect for both consumer and enterprise products.

Applied research techniques such as the utilization of competitive comparative analysis to contend at a high level with many of the BusinessHub Connect competitors currently in the market.

Aided in the creation of a new style guide utilized specifically for BusinessHub Connect applying essential user interface design principles.

UX/UI DESIGNER: MICROSOFT (THE CREATIVE GROUP)

APRIL 2016 - SEPTEMBER 2017

Spearheaded the creation of the new Add-in UX Design Pattern repository, providing internal/external parties design resources that compliment Office and utilize best practices.

Lead the design of a vertical style prototype utilizing low-fidelity artifacts to facilitate engineering work and spark stakeholder interest.

Delivered detailed heuristic evaluations, UI/IxD recommendations, and user research studies improving partner's Office Store presence.

QA ENGINEER: MOTOROLA SOLUTIONS

APRIL 2013 - APRIL 2016

Created robust, browser-based regression automation suites in Java using Selenium and TestNG to decrease manual test times by 66%.

Collaborated in an Agile focused development/test team to complete deadlines on or ahead of schedule.

Served as the primary Software Test Engineer for feature-rich SaaS products, delivering detailed suggestions on user interaction and functionality, bettering overall user experience.
